

Fresh.
Expertise.
Care.

FORSTAR

When it comes to food, you would only trust the most honest and responsible company. An organization that takes utmost care to ensure that you get a product that is fresh and of the highest quality.

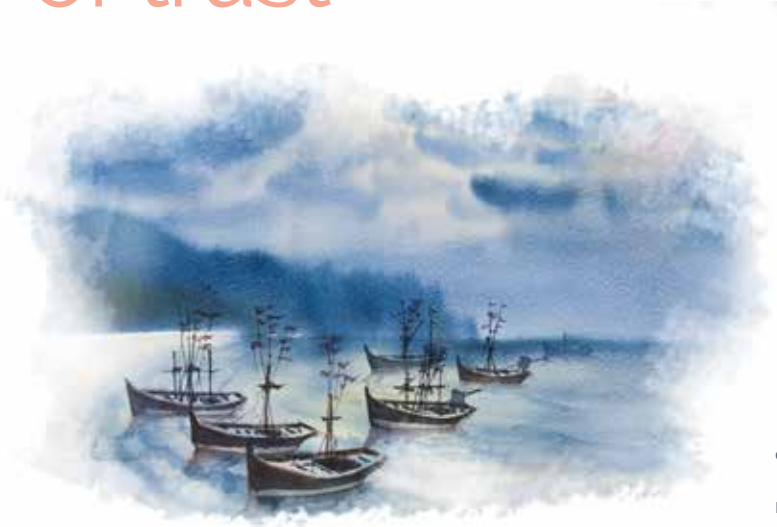

From our approach towards food to our very presence in the industry, every aspect of what we do reflects these tenets. Our journey in this field began over 40 years ago and it has been unbelievably rewarding. We have risen amongst the leaders in frozen seafood exports, offering high quality, quantity and versatility of products. All at once.

Forstar Frozen Foods Pvt. Ltd. is a dynamic and aspirational organization. Something that's possible only through collective dedication, enthusiasm and vision. Our team is passionate about their work, and is guided by the wealth of knowledge our mentors bring with them through 4 decades of experience in the seafood industry. Our efficient processes, top-notch packaging lines, quick turnaround time and value-added services have built our legacy of trust and expertise in this field.

As for our customers, our motto is simple. Customer satisfaction first. From legal compliances to fulfilling every statutory regulation, from fast deliveries to intuitive products, when it comes to our reputation and service, we leave no stone unturned. The company has, is and will always be committed to meeting international standards for quality and hygiene while ensuring that supply schedules are met and our clients are always delighted.

A symbol of trust

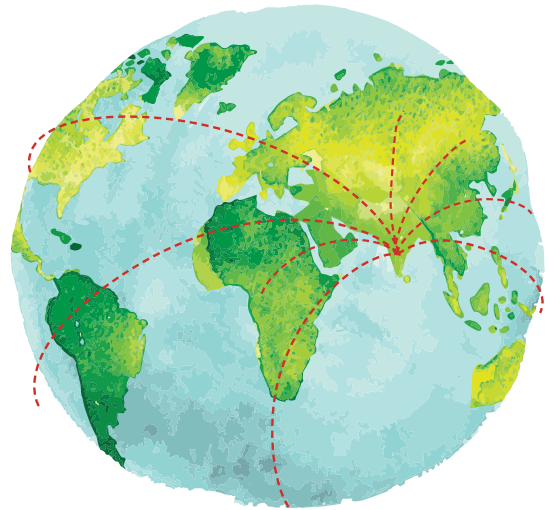

Our team of professionals constantly strives towards excellence, going beyond the given and exceeding expectations. That is to make sure every experience shared with us is a delightful and memorable one and to make sure we deliver food just the way it's wanted.

So, why should you trust us? To begin with, our factories are EU, USFDA, HACCP, BRC, BAP and HALAL certified and are located close to the main landing centres and ports of Mumbai. We source our seafood directly from the boats that go for short duration fishing near Mumbai and we partake in a direct harvest from the aquaculture ponds / farms in Gujarat, where we have contract farming. This makes sure that the raw material has no delays in transport and it reaches the factory in the quickest manner possible. Our scientifically controlled production process complemented with effective logistic planning through self owned refrigerated trucks ensures all food products maintain their natural freshness and taste. We can promise you frozen food that is not just fresh and hygienic, but also 100% natural.

Care across the world

Once you're a Forstar customer, you will always be one. Because our customers are our priority. That's a promise we live by. We care about the quality we offer – it must be perfect. We care about customer concerns – their satisfaction is paramount. We care about their time –

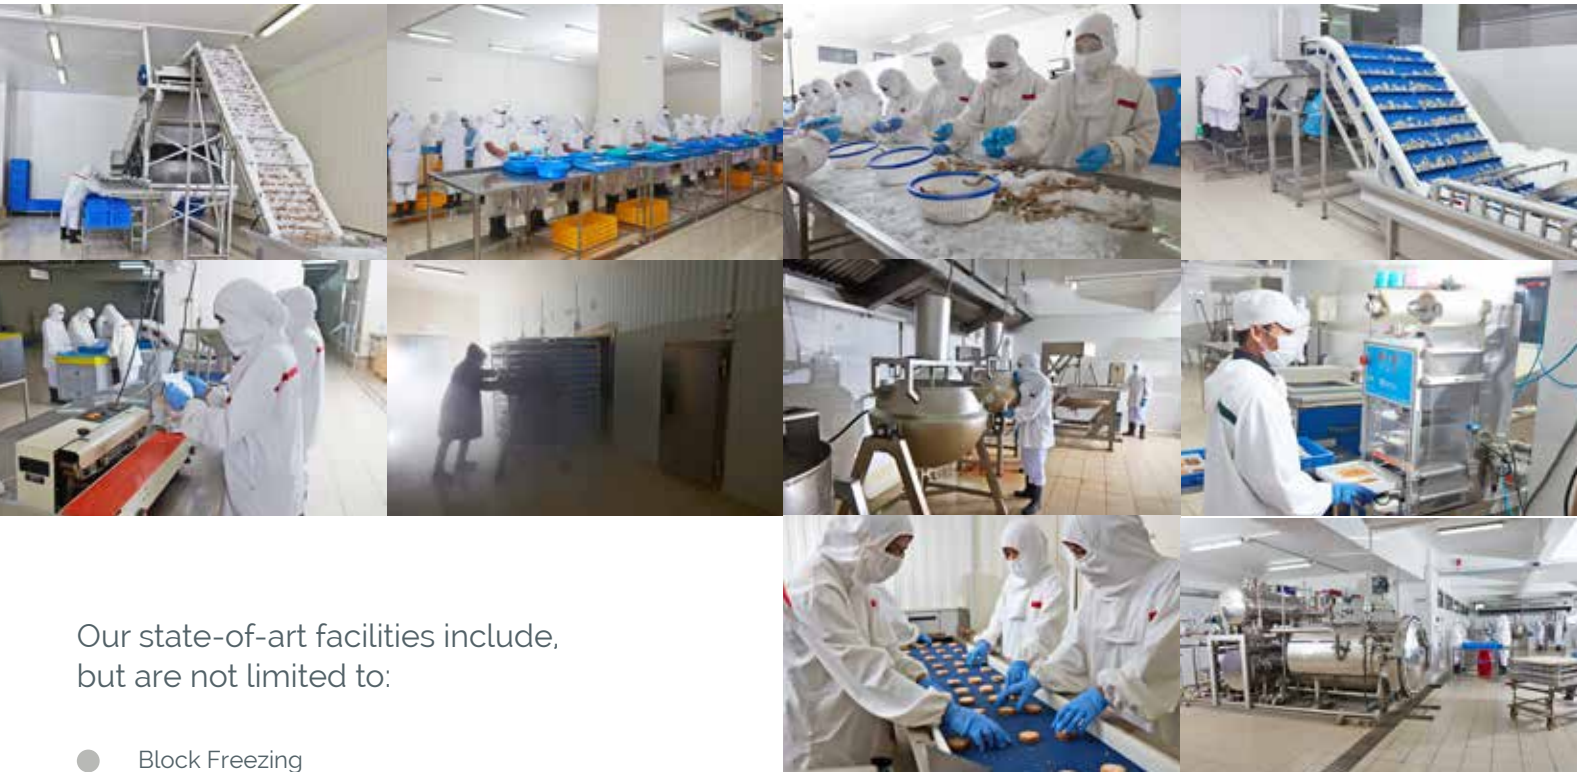

our turnaround time is deadline centric. We care that their needs are met – our diverse range of products will always whet an appetite. Forstar has earned the reputation of being the most quality conscious exporter from Mumbai, with clients spanning across EU, Japan, USA, UK, Canada, Africa, China, Vietnam, and the Middle East, amongst others.

Respect & Responsibility

For us, food, respect and responsibility go hand-in-hand. We respect the laws and ensure a strict compliance towards the business and the environment, both. We also strongly believe in supporting and fulfilling our responsibilities towards the communities that make our business possible. Forstar, therefore, works towards building sustainable livelihoods for fishermen by supporting them through the lean season. We believe it's essential to be responsible towards those who have been responsible for our success.

Expect Expertise

Our state-of-art facilities include, but are not limited to:

- Block Freezing
- Blast Freezing
- Trolley Freezing
- IQF (Raw / Blanched / Cooked)
- Retort Processing
- Breeding Line
- Nobashi Line
- Ready Meal (Frozen) Line
- Palletised Cold Stores

Value added production such as vacuum packs, skin wrapping, shrink wrapping, tray packs, etc.

Total Quality Control

Our full-fledged, global standard quality department ensures strict compliance with set standards at every stage of the processing. Regular on-line QC inspections ascertain that every package we ship surpasses international benchmarks of quality. And our technically qualified team supervises the entire operation of the plant - right from selecting the raw material to its processing to the freezing to storage and eventually to the final shipment.

Welcome to The world of Forstar
